

Product no **AS11 1737****Anti-Beta-CA1, beta-CA2 | carbonic anhydrase | mitochondrial | Chlamydomonas****Product information**

Immunogen	recombinant <i>Chlamydomonas reinhardtii</i> mitochondrial CA, as described in Villand et al. 1997. Accession number Q39590 and Q39589
Host	Rabbit
Clonality	Polyclonal
Purity	Serum
Format	Lyophilized
Quantity	200 µl
Reconstitution	For reconstitution add 200 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.
Additional information	Antibody is recognizing both isoforms, beta- CA1 and beta-CA2 and can be used as mitochondrial marker for low carbon dioxide grown cells of <i>Chlamydomonas reinhardtii</i>

Application information

Recommended dilution	1 : 200 (IF), 1 : 1000 (WB)
Expected apparent MW	23.7 21-22 kDa
Confirmed reactivity	<i>Chlamydomonas reinhardtii</i>
Predicted reactivity	<i>Chlamydomonas reinhardtii</i>
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
