## Product no AS16 3203

## Anti-BIN2 | Brassinosteroid insensitive 2

## **Product information**

Immunogen KLH-conjugated synthetic peptide derived from Arabidopsis thaliana BIN2 protein, Uniprot: Q39011, TAIR: AT4G18710

**Host** Rabbit

Clonality Polyclonal

**Purity** Immunogen affinity purified serum in PBS pH 7.4.

Format Lyophilized

Quantity 50 μg

**Reconstitution** For reconstitution add 50 μl of sterile water

Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please Storage remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

## Application information

Recommended dilution 1: 100 (IF), 1: 5000 (WB)

Expected | apparent 43.1 kDa

MW

**Confirmed reactivity** Arabidopsis thaliana (recombinanat BIN2)

Predicted reactivity Brassica sp., Cicer arietinum, Citrus sp. Cucumis melo, Cucumis sativus, Fragaria vesca, Glycine max, Glycine soja,

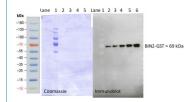

> Gossypium raimondii, Jatropha curcas, Lotus japonicus, Medicago trancula, Morus notabilis, Musa acuminata, Nelumbo nucifera, Phaseolus vulgaris, Populus sp., Ricinus communis, Sesamum indicum, Tarenaya hasslerina, Vigna

angularis, Vigna radicata, Vitis vinifera, Zostera marina

Not reactive in Monocots

Samples: Lane 1 = Marker; 2 = 2.5 ng BIN2 GST; 3 = 5 ng BIN2 GST; 4 = 10 ng BIN2 GST; 5 = 20 ng BIN2 GST; 6 = 30 ng BIN2 GST

From 2,5 30 ng of total protein from recombinant BIN2 GST purified protein eluted with the buffer 150 mM NaCl, 5mM DTT, 20mM GSH, 50mM TRIS/HCL pH 8.0 and denatured with 4X SDS +ß mercaptoethanol at 95°C for 5 min. The samples were separated on 10% SDS PAGE and blotted for 120 min to PVDF membrane using semi dry transfer. Blots were blocked with 5% milk powder in TBST for 60 min at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1: 5000 for 16 h overnight 4°C with agitation. The antibody solution was decanted, and the blot was rinsed briefly twice, then washed 1 time for 10 min in TBST buffer at RT with agitation. Blot was incubated in secondary antibody (anti rabbit IgG horse radish peroxidase conjugated, AS09 602, Agrisera) diluted to 1:10 000 in for 120 min at RT with agitation. The blot was washed as above and developed for 10 min with chemiluminescence detection reagent and exposed to X ray film. Exposure time was 60 seconds.

BIN2 43 kDa GST 26 kDa BIN2 GST 69 kDa
