Product no AS16 3127

Goat anti-Dog IgG (H&L), HRP conjugated

Product information

Immunogen Purified normal IgG isolated from pooled dog serum

Host Goat

Clonality Polyclonal

Purity Protein G purified goat IgG in PBS pH 7.2.

Format Lyophilized

Quantity 1 ml

Reconstitution For reconstitution add 1 ml of sterile destilled water

Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please

remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube. Reconstituted material can be stoored in 4°C up to 7 days.

Application information

Recommended dilution

1:1000-1:10 000 (ELISA), 1:100 and 1:500 (ICC), (IHC), The optimal working dilution should be established by titration by the end user, Excess labelled antibody should be avoided since it may cause high unspecific background staining and interfere with the specific signal

Confirmed reactivity Dog IgG

Not reactive in

This antibody does not react with any non-lg protein in dog serum, as tested by immunoelectrophoresis and double radial immunodiffusion

Additional information

Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiSerum has not been tested in detail.

No preservative added.

The reactivity of the antiserum is directed to the Fc and Fab subunits of the IgG molecule. It includes a certain degree of reactivity with other immunoglobulins via the common Fab portion.
