Product no AS14 2766

Anti-LHCSR3

Product information

Immunogen KLH-conjugated synthetic peptide derived from LHCSR3 protein sequence from Chlamydomonas reinhardtii, UniProt: P0DO18

Host Rabbit

Clonality Polyclonal

Purity Serum

Format Lyophilized

Quantity 50 ul

Reconstitution For reconstitution add 50 μl of sterile water

Storage Store lyophilized/reconstituted at -20 °C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

Application information

Recommended dilution 1:1000 (WB)

Expected | apparent 28 kDa

MW 20 KDa

Confirmed reactivity | Bryopsis corticulans, Chlamydomonas reinhardtii, Nannochloropsis gaditana

Predicted reactivity Phaeodactylum tricornutum

Species of your interest not listed? Contact us

Not reactive in Arabidopsis thaliana, Lobosphaera incisa, Marchantia polymorpha, Neochloris oleoabundans, Physcomitrella patens

Additional information This antibody is also recognizing recombinant LHCSR1 overexpressed in *E.coli* as described in <u>Perozeni</u> et al. (2020).

Roach et al. (2020). The non-photochemical quenching protein LHCSR3 prevents oxygen-dependent photoinhibition in Chlamydomonas reinhardtii. J Exp Bot. 2020 Jan 16. pii: eraa022. doi: 10.1093/jxb/eraa022.

Application example

Follwoing samples: 0.1 µg of LhcSR3 IB + HisTag (1), 0.05 µg of LhcSR3 IB + HisTag (2), 5 µg of Chlamydomonas reinhardtii wild type (CC124) total protein extract of photoautotrophically grown cells in light intensity: 60 µE (3), 5 µg of Chlamydomonas reinhardtii wild type (CC124) total protein extract of photoautotrophically grown cells in high light intensity: 500 µE (4) were separated on 15% Tris-Glycine SDS PAGE and blotted overnight to PVDF using tank transfer. Blots were blocked with 5% BSA/milk for 1h at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1: 1 000 for 1h at RT with agitation. The antibody solution was decanted and the blot was rinsed briefly twice, then washed once for 15 min and 3 times for 5 min in PBS-T at RT with agitation. Blot was incubated in secondary antibody (anti-rabbit IgG horse

radish peroxidase conjugated, from Agrisera, $\underline{AS09\ 602}$) diluted to 1:10 000 for 1h at RT with agitation. The blot was washed as above and developed for 5 min with ECL according to the manufacturer's instructions.
