Product no **AS12 2305**

## Goat anti-Mouse IgG (H&L), DyLight® 650 conjugated

### Product information

**Immunogen** | Purified Mouse IgG, whole molecule

**Host** | Goat

**Clonality** | Polyclonal

**Purity** | Affinity purified goat IgG

**Format** | Lyophilized

**Quantity** | 1 mg

**Reconstitution** | For reconstitution add 1.1 ml of sterile water. Let it stand 30 minutes at room temperature to dissolve. Prepare fresh working dilutions daily.

**Storage** | Store lyophilized material at 2-8°C. Product is stable for 4 weeks at 2-8°C after rehydration. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1.1 ml of sterile water add 1.1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to mix well but without foaming.

**Additional information** | Conjugate is present in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free. 0.05 % (w/v) sodium azide is added as preservative.

Based on immunoelectrophoresis, this antibody reacts with: heavy ( ) chains on mouse IgG light chains on all mouse immunoglobulins

No reactivity is observed to: non-immunoglobulin mouse serum proteins

### Application information

**Recommended dilution** | 1 : 20-1 : 2000 for most applications

**Not reactive in** |
