

Product no **AS09 524****MnSOD | Manganese superoxide dismutase****Product information**

Immunogen	KLH -conjugated synthetic peptide derived from available MnSOD sequences in di and monocotyl plants including <i>Arabidopsis thaliana</i> O81235 , At3g10920
Host	Rabbit
Clonality	Polyclonal
Purity	Serum
Format	Lyophilized
Quantity	50 µl
Reconstitution	For reconstitution add 50 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.
Additional information	Freshly prepared reducing agent like DTT needs to be used in a sample buffer, Otherwise MnSOD will migrate at 50 kDa

Application information

Recommended dilution	1 : 2000-1 : 5000 (WB)
Expected apparent MW	25 25 kDa
Confirmed reactivity	<i>Arabidopsis thaliana</i> , <i>Armeria maritima</i> , <i>Brassica napus</i> , <i>Brassica oleracea</i> , <i>Fragaria x ananassa</i> , <i>Iris pumila</i> , <i>Nepeta cataria</i> , <i>Nepeta rtanjensis</i> , <i>Oryza sativa</i> , <i>Pisum sativum</i> , <i>Salicornia</i> sp. , <i>Solanum tuberosum</i>
Predicted reactivity	<i>Gossypium mexicanum</i> , <i>Hordeum vulgare</i> , <i>Musa acuminata</i> , <i>Picea sitcHensis</i> , <i>Populus balsamifera sub. trichocarpa</i> , <i>Raphanus sativus</i> , <i>Solanum tuberosum</i> , <i>Triticum aestivum</i> , <i>Vitis vinifera</i> , <i>Zea mays</i> Species of your interest not listed? Contact us
Not reactive in	algae, <i>Marchantia polymorpha</i>

Application example

5 μ g (**1,2**), 10 μ g (**3, 4**) of total protein from *Pisum sativum* were separated on 12% SDS-PAGE and blotted 30 min. to **PVDF**. Blots were blocked (in 5% fat free milk) immediately following transfer in for 1h at RT with agitation. Blots were incubated in the primary antibody at a dilution of 1:2 000 overnight in 4°C with agitation. The antibody solution was decanted and the blot was rinsed briefly twice, then washed 4 times for 5 min in TBS-T at RT with agitation. Blots were incubated in secondary antibody (anti- IgG horse radish peroxidase conjugated, from Agrisera, [AS09 602](#)) diluted to 1:20 000 for 1h at RT with agitation. The blots were washed 4 times for 5 min in TBS-T and 2 times for 5 min in TBS and developed for 1 min with ECL detection reagent according to the manufacturers instructions. Exposure time was 60 seconds.
