APP | Amyloid Precursor Protein (N-term)

Product information

Immunogen	Synthetic peptide (aa 653-662 of human APP) or 1-10 of the 4kDa Amyloid- peptide. The 4 kDa amyloid peptide is a 40 amino acid sequence that is cleaved of from the human amyloid A4 protein precursor (APP) and therefore the amino acids 1-10 of the peptide correspond to amino acids 653-662 of APP.
Host	Rabbit
Clonality	Polyclonal
Purity	Affinity purified
Format	Liquid in PBS containing 0.02% sodium azide as a preservative.
Quantity	100 µg
Storage	Store at -20°C; make aliquots to avoid repeated freeze-thaw cycles. Please, remember to spin tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tubes.
Additional information	Detects an approximately 120 kDa band in human, mouse and rat brain tissue lysates.

Application information

Recommended dilution	Optimal concentration should be evaluated by serial dilutions. Detects APP and Ab peptide by Western blot at 0.5 to 1 µg/ml.
Confirmed reactivity	Human, mouse, rat
