

Product no **AS07 219****Anti-CCS | Chloroplastic copper chaperone for SOD****Product information**

Immunogen	The antibody was raised to the Arabidopsis thaliana full length CCs protein Q4ZJ15 , fused to His-tag. Overexpressed using pET28a vector in BL21 E. coli (Cd+) and purified using His-column. After purification, the His tag was cleaved using thrombin and then the protein was purified using Resource-Q column connected to HPLC.
Host	Rabbit
Clonality	Polyclonal
Purity	Serum
Format	Lyophilized
Quantity	200 µl
Reconstitution	For reconstitution add 200 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Application information

Recommended dilution	1 : 1000 (WB)
Expected apparent MW	33.8 37 kDa (<i>Arabidopsis thaliana</i>)
Confirmed reactivity	<i>Arabidopsis thaliana</i> , <i>Brassica juncea</i> , <i>Oryza sativa</i> , <i>Zea mays</i>
Predicted reactivity	<i>Glycine max</i> , <i>Hordeum vulgare</i> , <i>Solanum tuberosum</i> Species of your interest not listed? Contact us
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
