

Product no **AS13 2650****Anti-L13-1 | 60S ribosomal protein L13-1****Product information**

Immunogen	KLH-conjugated synthetic peptide derived from <i>Arabidopsis thaliana</i> UniProt: P41127 , TAIR: At3g49010
Host	Rabbit
Clonality	Polyclonal
Purity	Antigen affinity purified serum in PBS pH 7.4.
Format	Lyophilized
Quantity	50 µg
Reconstitution	For reconstitution add 50 µl of steril water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Application information

Recommended dilution	1 : 2500 (WB)
Expected apparent MW	23.7 29 kDa (<i>Arabidopsis thaliana</i>)
Confirmed reactivity	<i>Arabidopsis thaliana</i> , <i>Hordeum vulgare</i> , <i>Nicotiana benthamiana</i>
Predicted reactivity	<i>Brassica napus</i> , <i>Chlamydomonas reinhardtii</i> , <i>Nicotiana tabacum</i> , <i>Oryza sativa</i> , <i>Picea excelsa</i> , <i>Populus balsamifera</i> , <i>Sorghum bicolor</i> , <i>Ricinus communis</i> , <i>Zea mays</i> , <i>Vitis vinifera</i> Species of your interest not listed? Contact us
Not reactive in	Diatoms
Additional information	Protein or membrane sample should be treated at 70°C for 10 min before loading on the gel

**Samples:**

- 1 - 15 µg of *Arabidopsis thaliana* whole seedling extract
- 2 - 15 µg of *Arabidopsis thaliana* whole seedling extract
- 3 - 15 µg of *Arabidopsis thaliana* whole seedling treated with Drug-1
- 4 - 15 µg of *Arabidopsis thaliana* whole seedling treated with Drug-2

15 µg/well of total protein extracted freshly from *Arabidopsis thaliana* 8-day-old seedlings extracted with buffer containing 8 M Urea. Samples were separated in the RT on 12 % SDS-PAGE and blotted for 2 h to PVDF (pore size of 0.2 µm), using: wet transfer in the cold. Blot was blocked with 10 % milk for 1h/RT with agitation. Blot was incubated in the primary antibody at a dilution of 1: 3000 for 1h/RT in PBS with agitation. The antibody solution was decanted, and the blot was rinsed briefly twice, then washed once for 15 min and 3 times for 5 min in PBS at RT with agitation. Blot was incubated in matching secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated) diluted to 1: 5000 in for 1 h/RT with agitation. The blot was washed as above and developed with a chemiluminescent detection reagent. Exposure time was 1 minute.
