Product no AS09 527-DL488

AGO1 | Argonaute 1, DyLight® 488 conjugated (40 µg)

Product information

Immunogen KLH-conjugated, N-terminal peptide of Arabidopsis thaliana AGO1 004379, At1q48410

Host Rabbit

Clonality Polyclonal

Purity Immunogen affinity purified serum, in PBS pH 7.4, conjugated to DyLight® 488.

Format Liquid in PBS pH 7,4.

Quantity 40 μg

Storage Store at 4°C for 12-18 months, A preservative may be added for long time storage up to 2 years. Spin briefly the tube

before use.

Additional information Antibody binds microRNA and tasiRNAs, preference for 21nt miRNAs with 5'U,TCA acetone total protein precipitation

method.

DyLight® 488 Amax = 493 nm, Emax = 519 nm. DyLight® is a registered trademark of Thermofisher Inc., and its

subsidiaries

Application information

Recommended dilution To be determined by end user.

Expected | apparent 116,4 | 130 kDa

Predicted reactivity Brassica pekinensis, Capsella rubella, Glycine max, Malus domestica, Pisum sativum, Ricinus communis, Solanum

tuberosum, Zea mays, Vitis vinifera

Species of your interest not listed? Contact us

Not reactive in Chlamydomonas reinhardtii

Additional information AGO expression may be tissue specific and using floral tissue is recommended where most of the AGOs are expressed

the highest. Use of proteasome inhibitors as MG132 can help to stabilize AGO proteins during extraction procedure. The AGO1 antibody is extremely specific to AGO1 and does not cross-react with other antibodies. The evidence is 1) the peptide to which it was raised is at the very N-terminus of the protein and is not present in other AGOs 2) aAGO1 does not cross react with the AGOs which are overexpressed (AGO2, AGO3, AGO4, AGO5, AGO6, AGO9) using a

western blot.

Selected references To be added when available. Antibody released in May 2023.
