# Product no AS15 2992 Anti-APX1 | Ascorbate peroxidase (algal)

### **Product information**

 Immunogen
 KLH-conjugated synthetic peptide derived from Chlamydomonas reinhardtii APX sequence, UniProt: O49822

 Host
 Rabbit

 Clonality
 Polyclonal

 Purity
 Serum

 Format
 Lyophilized

 Quantity
 50 µl

 Reconstitution
 For reconstitution add 50 µl of sterile water

 Storage
 Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

# **Application information**

Recommended dilution	1 : 9000 (WB)
Expected   apparent MW	35 kDa
Confirmed reactivity	Chlamydomonas reinhardtii
Predicted reactivity	Coccomyxa subellipsoidea C-169, Cyanidioschyzon merolae, Galdieria sulphuraria, Micromonas pusilla (strain CCMP1545), Nannochloropsis gaditana, Ostreococcus lucimarinus (strain CCE9901), Ulva fasciata, Volvox carteri Species of your interest not listed? <u>Contact us</u>
Not reactive in	Galdieria sulphuraria

#### **Application information**

25 µg of total protein from *Chlamydomonas reinhardtii* extracted with 2 % SDS / 50 mM TRIS pH 6.8 + protease inhibitor cocktail were separated on 12 % SDS-PAGE and blotted for 1 h to PVDF using semi-dry transfer. Blots were blocked with 5 % low-fat milk powder TBS + 0.1 % Tween for 1 h at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1: 2,500 for 1 h at RT with agitation. The antibody solution was decanted and the blot was rinsed, then washed 3 times each for 5 min in TBS-T at RT with agitation. Blot was incubated in secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated, from Sigma) diluted to 1:25,000 in 2 % low-fat milk powder TBS + 0.1 % Tween for 1 h at RT with agitation. The blot was washed as above and developed with chemiluminescent detection reagent, according to the manufacturer's instructions. Exposure time was typically 30 seconds.
