

Anti-BirA (mutated/TurboID) - DyLight® 488 conjugated (40 µg)

Qty: AS20 4440-DL488

AS20 4440-DL488 | Clonality: **Polyclonal** | Host: **Rabbit** | Reactivity: ***E. coli* BirA - mutated/TurboID overexpressed in various organisms**

Price: 442 €

- Product Info

Immunogen:	Recombinant mutated BirA protein from <i>E. coli</i> produced using the following plasmid: TurboID-His6_pET21a, (Plasmid #107177). Expression was done in a vector that allowed for the generation of an untagged protein (without HIS6tag).
Host:	Rabbit
Clonality:	Polyclonal
Purity:	Immunogen affinity purified serum, in PBS pH 7.4, conjugated to DyLight® 488.
Format:	Liquid in PBS pH 7.4.
Quantity:	40 µg
Storage:	Store at 4°C for 12-18 months. A preservative may be added for long time storage up to 2 years. Spin briefly the tube before use.
Tested applications:	Immunofluorescence (IF), Western blot (WB)
Recommended dilution:	To be determined by end user.
Expected apparent MW:	Depends upon fusion partner

- Reactivity

- Confirmed reactivity: BirA (mutated/TurboID)

Not reactive in: No confirmed exceptions from predicted reactivity are currently known,

- Additional Information

- Additional information: DyLight® 488 Amax = 493 nm, Emax = 519 nm. DyLight® is a registered trademark of Thermofisher Inc., and its subsidiaries.

- Background

- **Tagging a protein with TurboID** allows studying protein interactions in different types of cells and organs and developmental stages. This is a suitable tool for proximity labelling experiments as described in Mair et al, (2019), Proximity labelling of protein complexes and cell-type-specific organellar proteomes in Arabidopsis enabled by TurboID, Elife, 2019 Sep 19;8:e47864, doi: 10.7554/eLife.47864, This tag has MW of 35 kDa.
