Lyophilized antibody can be stored at -20°C for up to 3 years. Re-constituted antibody can be stored at 4°C for several days to weeks. Once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Additional information The protein shows tissue specific expression, shown on a blot included in <u>Wu</u> et al. (2000). Lowest amounts of ECA1

are found in siliques.
