Product no AS20 4428

Anti-Fd-GOGAT | Ferredoxin-dependent Glutamate synthase

Product information

Immunogen Purified full-length, tag cleaved, recombinant Zea mays GOGAT, UniProt: P23225

Host Rabbit

Clonality Polyclonal

Purity Total IgG. Protein A purified in PBS, 50% glycerol. Filter sterilized.

Format Liquid at 2 mg/ml.

Quantity 100 μg

Storage Storage Store at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the

tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the

tube.

Application information

Recommended dilution 1: 2000 - 1: 5000 (WB)

Expected | apparent 175 kDa (Zea mays), 168 kDa (Arabidopsis thaliana)

ferredoxin-dependent glutamate synthase in maize leaf. J Biol Chem. Feb 5;266(4):2028-35.

Recombinant FdGOGAT from Zea mays (1), 10 µg of Arabidopsis thaliana total leaf extract (2), 10 µg of Zea mays total leaf extract (3),were freshly extracted with 2x SDS-sample buffer (+ 2ME) for SDS-PAGE and denatured with 4X SDS buffer at 95 °C for 5 min. Samples were separated on 10% SDS-PAGE and blotted 1h to PVDF membrane. Blot was blocked with 3 % skim milk/TBS-T, 1h/RT with agitation. Blot was incubated in the primary antibody at a dilution of 1: 2500 in TBS-T for 1h/RT. The antibody solution was decanted and the blot was washed 4 times for 10 min in TBS-T at RT with agitation. Blot was incubated in matching secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated) diluted to 1:10 000 in for 1h/RT with agitation. The blot was washed as above and developed with a chemiluminescent detection reagent, following manufacture's recommendation.
