## Product no AS10 779

## Goat anti-Human IgG (H&L), F(ab)'2 fragment, HRP conjugated

## **Product information**

Immunogen Purified human IgG (H&L)

Host Goat

Clonality Polyclonal

**Purity** Immunogen affinity purified goat IgG.

Format Lyophilized

Quantity 0.5 mg

**Reconstitution** For reconstitution add 0,55 ml of sterile water

Storage Store lyophilized ma

Store lyophilized material at 2-8 °C. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20 °C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1.1 ml of sterile water add 1.1 ml of glycerol. Such solution will not freeze in -20 °C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

**Additional information** 

HRP-conjugate is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 10% (w/v) BSA, Protease/lgG free

0.1% (v/v) of Kathon CG is used as preservative. Use of sodium azide will inhibit enzyme activity of horseradish peroxidase

Purity is ≥90% based on SDS-PAGE. May contain small amounts of intact IgG.

## **Application information**

**Recommended dilution** The optimal working dilution should be determined by the investigator

Confirmed reactivity Human IgG (H&L), F(ab)'2 fragment

Predicted reactivity | Human IgG (H&L), F(ab)'2 fragment

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Additional information This antibody reacts with the heavy chains on human IgG and with the light chains on all human immunoglobulins based on immunoelectrophoresis.

No reactivity is observed to non-immunoglobulin human serum proteins based on immunoelectrophoresis.
