## Product no AS10 668 Goat anti-Rabbit IgG (H&L) HRP conjugated, min,cross-reactivity to bovine/Human/mouse IgG/serum

## **Product information**

Immunogen	purified Rabbit IgG, whole molecule
Host	Goat
Clonality	Polyclonal
Purity	Immunogen affinity purified goat IgG.
Format	Lyophilized
Quantity	1 mg
Reconstitution	For reconstitution add 1,1 ml of sterile water, Let it stand 30 minutes at room temperature to dissolve, Prepare fresh working dilutions daily
Storage	Store lyophilized material at 2-8°C. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1,1 ml of sterile water add 1,1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.
Additional information	HRP-conjugate is supplied in 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 10 % (w/v) BSA, Protease/IgG free
	0.1 % (v/v) of Kathon CG is used as preservative. Use of sodium azide will inhibit enzyme activity of horseradish peroxidase.
	Concentration: 1.0 mg/ml (E 1% at 280 nm = 13.0)
Application inform	nation
Recommended dilution	1 : 500 -1 : 5000 (ELISA), 1 : 500 -1 : 5000 (IHC), 1 : 500 -1 : 5000 (WB)
Confirmed reactivity	heavy chains of Rabbit IgG, Light chains on all Rabbit immunoglobulins
Predicted reactivity	Rabbit IgG Heavy and Light chains (H&L) of all Rabbit immunoglobulins
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
Additional information	Based on immunoelectrophoresis no reactivity is observed to:
	non-immunoglobulin rabbit serum proteins serum from bovine, human or mouse
