

Product no **AS18 4245**

Goat anti-Rat IgA (Fc specific), TRITC-conjugated

Product information

Immunogen | Purified pools of homogenous IgA isolated from pooled rat serum,

Host | Goat

Clonality | Polyclonal

Purity | Purified by salt precipitation, followed by a ion-exchange chromatography with DEAE Sepharose, in PBS pH 7.2.

Format | Lyophilized

Quantity | 10 mg

Reconstitution | For reconstitution add 1 ml of sterile distilled water, Spin down to remove insoluble particles

Storage | Store at +4 °C, for long time storage, store at -20 °C.

Additional information | Does not react with any non-Ig protein in rat serum.
It does not discriminate between serum IgA (monomeric and dimeric) and higher molecular forms such as secretory IgA.

Application information

Recommended dilution | The optimum working dilution should be established by titration before being used

Confirmed reactivity | Rat IgA Fc
