## Product no AS09 620

## Goat anti-Rat IgG (H&L), ALP conjugated

## **Product information**

Immunogen Purified Rat IgG, whole molecule

Host Goat

Clonality Polyclonal

**Purity** Immunogen affinity purified goat IgG.

Format Liquid

Quantity 1 mg

Storage

Non-diluted antibody is stable for 4 years at 2-8 °C. For storage at -20 °C dilute antibody solution with an equal volume of glycerol to obtain final glycerol concentration of 50 % to prevent loss of enzymatic activity. Such solution will not freeze in -20 °C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

**Additional information** 

ALP conjugate is supplied in 30 mM Triethanolamine, pH 7,2, 5 mM Magnesium Chloride, 0,1 mM Zinc Chloride, 1 % (w/v) BSA, Protease/lgG free, 0,05 % (w/v) of sodium azide is added as preservative

## **Application information**

Recommended dilution 1:500-1:2000 (ELISA), 1:20 -1:2000 (IHC), 1:500-1:2000 (WB)

Confirmed reactivity Rat IgG heavy and light chains (H&L)

Predicted reactivity Rat IgG Heavy and Light chains (H&L)

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Additional information No reactivity is observed to non-immunoglobulin rat serum proteins based in immunoelectrophoresis, No reacticity to

mouse and human serum proteins based on immunoelectrophoresis
