

Product no **AS05 063****Anti-HSP90 | Heat shock protein 90****Product information**

Immunogen	KLH-conjugated synthetic peptide chosen from a highly conserved region of hsp90 found in both the alpha P07900 and beta P08238 form of the protein. The target peptide is perfectly conserved in animals.
Host	Rabbit
Clonality	Polyclonal
Purity	Serum
Format	Lyophilized
Quantity	100 µl
Reconstitution	For reconstitution add 100 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Application information

Recommended dilution	1 : 5 000 (WB)
Expected apparent MW	84-86 kDa
Confirmed reactivity	Human, Salmon
Predicted reactivity	Fishes, Hen, Mammals
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
Additional information	in salmonid fish a cross-reactive band at approximately 40 kDa is observed; antibody will also detect a human recombinant HSP90 protein Antibody is reacting strongly with recombinant HSP90 from HELA cells.
