## Product no AS05 063

## Anti-HSP90 | Heat shock protein 90

## **Product information**

Immunogen KLH-conjugated synthetic peptide chosen from a highly conserved region of hsp90 found in both the alpha P07900 and beta P08238 form of the protein. The target peptide is perfectly conserved in animals.

**Host** Rabbit

Clonality Polyclonal

**Purity** Serum

Format Lyophilized

Quantity 100 ul

Reconstitution For reconstitution add 100 µl of sterile water

Storage | Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

## Application information

Recommended dilution 1:5 000 (WB)

Expected | apparent

84-86 kDa MW

Confirmed reactivity Human, Salmon

Predicted reactivity Fishes, Hen, Mammals

Not reactive in No confirmed exceptions from predicted reactivity are currently known

**Additional information** in salmonid fish a cross-reactive band at approximately 40 kDa is observed; antibody will also detect a human recombinant HSP90 protein

Antibody is reacting strongly with recombinant HSP90 from HELA cells.
