

Product no **AS21 4681**

Anti-HSV epitope tag

Product information

Immunogen	HSV epitope tag, sequence: SQPELAPEDPED
Host	Mouse
Clonality	Monoclonal
Subclass/isotype	IgG1a
Purity	Affinity purified in PBS pH 7.4. Contains 0.02 % sodium azide. Contains 50 % glycerol.
Format	Liquid
Quantity	50 µg
Storage	Store at -20 °C. Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

Application information

Recommended dilution	1: 500 - 1: 5000 (WB)
Expected apparent MW	Depends upon protein fusion partner
Confirmed reactivity	HSV epitope tag
Selected references	To be added when available, antibodies released in October 2021.
