

Product no **AS15 2839****Llama anti-Rabbit IgG (H&L), DyLight® 488 conjugated****Product information****Immunogen** Purified Rabbit IgG, whole molecule**Host** Llama**Clonality** Polyclonal**Purity** Immunogen affinity purified rabbit IgG.**Format** Lyophilized**Quantity** 1 mg**Reconstitution** For reconstitution add 1.1 ml of sterile water. Let it stand 30 minutes at room temperature to dissolve. Prepare fresh working dilutions daily**Storage** Store lyophilized material at 2-8°C. Product is stable for 4 weeks at 2-8°C after rehydration. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1.1 ml of sterile water add 1.1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to mix well but without foaming.**Additional information** 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1 % (w/v) BSA, Protease/IgG free, 0.05 % (w/v) of Sodium azide as preservative.

Based on IEP, this antibody reacts with: heavy () chains chains on rabbit IgG light chains on all on all rabbit immunoglobulins

Based on IEP, no reactivity is observed to non-immunoglobulin rabbit serum proteins

Application information**Recommended dilution** The optimal working dilution should be determined by the investigator**Confirmed reactivity** Reacts with: heavy () chains chains on rabbit IgG light chains on all on all rabbit immunoglobulins**Not reactive in** Based on IEP, no reactivity is observed to: non-immunoglobulin rabbit serum proteins
