

Product no **AS18 4199-1ml****Anti-Pectic polysaccharide, alpha-1,5-arabinan (monoclonal, clone LM6-M)****Product information**

| | |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen | Pectic polysaccharide (alpha-1,5-arabinan). This antibody was isolated from a high throughput screen of many antibodies generated by immunization with a pectic fraction. |
| Host | Rat |
| Clonality | Monoclonal |
| Subclass/isotype | IgM |
| Purity | Cell culture supernatant. |
| Format | Liquid |
| Quantity | 1 ml |
| Storage | Store at +4°C (short term) and at -20°C (long term). Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from any material adhering to the cap or sides of the tube. |

|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Additional information | Contains 0.05% Sodium Azide. This antibody is recognizing a (1-5)-alpha-L-arabinan in a similar manner as an antibody to Pectic polysaccharide, alpha-1,5-arabinan (monoclonal, clone LM6) . This antibody is an IgM isotype. |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Application information

| | |
|-----------------------------|-----------------------------------------------------------------------|
| Recommended dilution | 1:10 (ELISA, IF) |
| Confirmed reactivity | Higher plants, ferns and mosses |
| Not reactive in | No confirmed exceptions from predicted reactivity are currently known |
