

Product no **AS18 4194-1ml****Anti-Pectic polysaccharide, homogalacturonan (monoclonal, clone JIM5)****Product information**

Immunogen	Pectic polysaccharide, Homogalacturonan domain,
Host	Rat
Clonality	Monoclonal
Subclass/isotype	IgG
Purity	Cell culture supernatant.
Format	Liquid
Quantity	1 ml
Storage	Store at +4 °C (short term) and at -20 °C (long term). Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from any material adhering to the cap or sides of the tube.
Additional information	Contains 0.05% Sodium Azide Has no known cross-reactivity with other polymers. Binds to paritally methyl esterified homogalacturonan and can also bind to un-esterified homogalacturonan.

Application information

Recommended dilution	1:10 (ELISA, IF)
Confirmed reactivity	Higher plants, ferns and mosses
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
