

Total Aflatoxins | ELISA quantitation kit

Qty: AS20 4395

AS20 4395 | Reactivity: **Total Aflatoxins from corn, feed, edible oil, peanuts, rice, tissue**

Price: 989 €

Background | This ELISA assay utilise the principle of competitive binding to measure the concentration of Total Aflatoxins in analyzed samples. The Total Aflatoxins were pre-coated on the surface of the reaction wells. Samples, containing an unknown amount of Total Aflatoxins, or standards are added to the appropriate plate wells together with anti-Total Aflatoxins antibody and Horseradish Peroxidase (HRP) conjugated anti-antibody. During incubation the competitive inhibition reaction occurs between pre-coated Total Aflatoxins and Total Aflatoxins in standards and samples with specific antibody against Total Aflatoxins. Substrate solution is added to the wells and the color develops in opposite to the amount of Total Aflatoxins in the sample or standards. Reaction is stopped and the intensity of the color is measured at 450 nm.

Reaction wells | 96**Assay development time** | 1-2 hours**Sensitivity** | < 0.02 ppb**Detection range** | 0.02 ppb - 1.62 ppb**Limit of detection** | corn, edible oil, feed, peanuts, rice, tissue: 2 ppb**Recovery rate** | corn, edible oil, feed, peanuts, rice, tissue: 95 ± 35%**Sample volume** | 50 µl**Detection wavelength** | 450 nm**Intra-assay precision** (within an assay) | CV%<10%**Intra-assay precision** (between assays) | CV%<10%**Storage** | 2-8 °C

Manual in Pdf

Cross-reactivity to other compounds

Compound | Cross-reactivity (%)

Aflatoxin B1 | 100%
 Aflatoxin M1 | 91.2%
 Aflatoxin B2 | 68.4%
 Aflatoxin G1 | 4.7%
 Aflatoxin G2 | 2.7%

Sample type | corn, edible oil, feed, peanuts, rice, tissue

This product is **for research use only** (not for diagnostic or therapeutic use)
